

Did you know that by the age of 27, your skin begins to slow its production of collagen? Collagen is a main structural protein found throughout our body. Collagen provides the strength our tissue and organs require while elastin provides the ability to stretch and recoil. **RX Systems scientifically-formulated 20% Vitamin C Serum** stimulates collagen production and cell growth to improve skin elasticity, texture and color! It also reduces the appearance of fine lines and wrinkles, plus protects your skins from premature aging caused from sun and environmental exposure! Try it today!
